

*America became great because of our ability to adapt to a changing world. Now to stay competitive we must invest in renewable solar, wind & geothermal energy.*

## **JOBS!!!**

Constructing Solar, Wind, Geothermal and Rail industries in Virginia will generate thousands of jobs & reduce our dependency on fossil fuels. We can do it with private industry using the government only to spur public-private investment and easing of impediments to starting new technological businesses.

In Virginia, renewable energy already employs more workers than coal. Virginia has one of the nation's fastest-growing renewable energy economies. Clean energy jobs increased at a rate of more than 8 percent a year, even during the recession. Energy efficiency and renewable energy alone account for more than 11,000 Virginia jobs. ## More Trains, Less Traffic

Our team proposes increased mass transit - especially here in Northern Virginia.

Extending Metrorail service proposals include:

- Blue Line Springfield to Woodbridge
- Yellow Line Huntington to Ft. Belvoir
- East Falls Church to Seven Corners
- Pentagon City to Skyline/Baileys Cross-roads
- Orange Line down I-66 to Haymarket
- Light rail along Rt.28 from Manassas to Dulles Airport.

It is time that we drastically reduce traffic congestion and generate an economic boost for our communities.

*Not conservative or liberal,  
but Smart, Bold & Populist!*

*It's time for fairness and honesty.*

*Community involvement is the foundation  
for public policy.*

*Vote - To empower citizens, we need  
expanded voter participation.*

*Join - Take Action Against Apathy.*

*Run - Run for office to make a difference.  
Again in 2013 there are 42 unopposed for  
the General Assembly.*
